IBRAHIM SALEEM

AI Data Trainer (Coding & Tamil-English Bilingual) | Software Developer | HR Sr. Executive

Email: zainrizvi0611@gmail.com | Phone: +91 9994396125 | GitHub: github.com/zainrizvi0611-cmd | India

PROFESSIONAL SUMMARY

Detail-oriented Electronics & Communication Engineering (ECE) graduate and former HR Senior Executive at Teleperformance Business Services Pvt. Ltd. (2021-2023) with hands-on proficiency in Python, Java, TypeScript, and open-source software development. Native Tamil speaker with strong English communication skills, experienced in LLM evaluation (RLHF/SFT), code debugging, prompt engineering, and bilingual linguistic annotation.

TECHNICAL & AI TRAINING SKILLS

Programming Languages: Python, Java, TypeScript, JavaScript (ES6+), SQL, C, HTML5, CSS3

AI & LLM Training: RLHF, Supervised Fine-Tuning (SFT), Prompt Engineering, Code Review & Debugging, Rubric-Based Evaluation, Factuality Verification, Tamil-English Translation & Localization

Tools & Technologies: Git, GitHub, Node.js, React, Linux, REST APIs, Unit Testing, Advanced Excel

Core Domains: Software Engineering, Electronics & Circuit Design (ECE), HR Operations & Quality Audits

WORK EXPERIENCE

Freelance Software Contributor & AI Model Evaluator (Coding & Tamil) — 2023 - Present

Remote | Open-Source (github.com/zainrizvi0611-cmd) & AI Training Projects

- Developed and submitted verified bug fixes and unit tests in TypeScript, Python, and Java for open-source engineering packages (including tscircuit/core PCB layout, schematic rendering, and component validation).
- Authored complex coding prompts, reference solutions, and test suites in Python and Java to train and benchmark Large Language Models (LLMs) on algorithmic problem solving and debugging tasks.
- Conducted Tamil (Native) and English bilingual LLM response evaluations, grading grammar, cultural naturalness, instruction following, and factual accuracy across multi-turn conversations.

Senior Executive - Human Resources (HR Sr. Executive) — 2021 - 2023

Teleperformance Business Services Pvt. Ltd.

- Managed end-to-end talent acquisition, candidate assessment, onboarding, and HR operations across high-volume technical and business support teams.
- Automated HR data reporting, attendance tracking, and performance analytics workflows using Python scripts, SQL queries, and Advanced Excel macros, reducing manual reporting time by 35%.
- Conducted bilingual (Tamil & English) communication assessments, quality audits, and structured training evaluations to maintain high service delivery standards.

KEY TECHNICAL PROJECTS

Open-Source Circuit & Layout Engine Contributions (tscircuit/core) | TypeScript, Python

- Implemented capacitance validation, PCB keepout group packing transforms, schematic RGB color portability, and extended designator selector parsing with 100% CI test pass rates across 18 automated check suites.

Automated Candidate & Data Evaluation Pipeline | Python, Java, SQL

- Built data validation and scoring utilities in Python and Java to parse structured datasets, verify rubric compliance, and generate automated quality summary reports.

EDUCATION

Diploma in Electronics and Communication Engineering (ECE)

Relevant Coursework: Programming in C/Python, Object-Oriented Programming (Java), Digital Electronics, Microprocessors & Microcontrollers, Electronic Circuit Design, Communication Systems.

LANGUAGES

- Tamil: Native / Bilingual Proficiency (Reading, Writing, Speaking, Linguistic & Translation Evaluation)
- English: Good / Professional Working Proficiency (Technical Documentation, Prompt Engineering, Business Comm.)
